PROFESSIONAL SUMMARY

Senior Backend Engineer with 5+ years of experience designing, building, and operating production backend systems in Python and Go. Delivered and maintained 17+ production applications across MLM, e-commerce, CRM, LMS, ticketing, and customer support domains, including multi-module platforms serving 10,000+ users. Experienced with microservices and monolithic architectures, REST and gRPC APIs, asynchronous and event-driven processing, and PostgreSQL performance tuning, including reducing a critical query from nearly 2 minutes to 5 milliseconds. Integrates LLM capabilities into backend products using the OpenAI, Gemini, and Claude APIs and Retrieval-Augmented Generation (RAG).

SKILLS

Languages: Python, Go (Golang), JavaScript, TypeScript, HTML, CSS

Backend Frameworks: Django, Django REST Framework, FastAPI, Gin

Architecture: Microservices, Monolithic Architecture, Distributed Systems, System Design, Event-Driven Architecture, Clean Architecture, REST APIs, gRPC, WebSockets

Databases & Search: PostgreSQL, Redis, Elasticsearch, PgBouncer

Messaging & Async Processing: RabbitMQ, Celery, Go Workers, Cron Jobs

AI & LLM: OpenAI API, Gemini API, Claude API, LLM Integrations, Retrieval-Augmented Generation (RAG), Prompt Engineering, Agentic Development Workflows

Cloud & DevOps: AWS EC2, AWS SNS, Docker, Docker Compose, Nginx, CI/CD, GitHub Actions, Jenkins, Sentry

Integrations: Stripe, PayPal, Razorpay, NMI, Coinbase, CoinPayments, WhatsApp, Zapier, Mighty Networks, Zoho Desk, OAuth, SSO

Frontend: React, Next.js, Ajax, jQuery

PROFESSIONAL EXPERIENCE

Epixel Solutions Pvt Ltd — Kerala, India

Senior Software Engineer Jan 2024 – Present

Junior Software Engineer Dec 2020 – Jan 2024

- Designed, built, and maintained scalable backend systems and distributed services in Python and Go using Django, Django REST Framework, FastAPI, Gin, PostgreSQL, Redis, and Docker.
- Delivered and maintained 17+ production applications across MLM, e-commerce, CRM, LMS, ticketing, and customer support domains, serving more than 10,000 users.
- Reduced a critical database query's execution time from nearly 2 minutes to 5 milliseconds through query optimization and indexing strategies.
- Developed and maintained 50+ REST APIs and built 8 microservices in Python and Go to support asynchronous and event-driven workflows.
- Built background workers, cron jobs, WebSocket services, and gRPC-based services for high-performance processing.
- Customized and enhanced an 18-module platform spanning user management, binary/unilevel/matrix networks, wallets, commission and ranking engines, subscriptions, payment processing, reporting, notifications, and transaction workflows.
- Migrated 10,000+ users and their transactional data across production environments.
- Integrated payment, messaging, automation, and AI services, including Stripe, PayPal, NMI, Razorpay, Coinbase, CoinPayments, WhatsApp, Zapier, Mighty Networks, Zoho Desk, AWS SNS, and the OpenAI, Gemini, and Claude APIs.
- Independently owned and delivered the ticketing, notification, and customer support modules.
- Managed production infrastructure on AWS EC2 with Docker, Nginx, PgBouncer, Redis, RabbitMQ, Elasticsearch, Sentry, and CI/CD pipelines; handled production incidents, hotfixes, monitoring, and reliability improvements.
- Contributed to requirements analysis, system design, database schema design, and architecture discussions, and collaborated directly with clients and cross-functional teams on production releases.
- Performed code reviews and mentored 3 junior engineers within a team of 15 developers.

EDUCATION

Diploma in Electronics Engineering 2017 – 2020
SSM Polytechnic College, Tirur, Kerala
CGPA: 9.24 / 10

CERTIFICATIONS

- Go Programming Language
- Python
- Academy Accreditation – Generative AI Fundamentals

LANGUAGES

English (Professional Working), Malayalam (Native), Arabic (Limited Working)
